PROFESSIONAL SUMMARY

Creative Front-End Developer with a strong eye for high-end aesthetics and micro-interactions. Specializing in React.js and modern CSS frameworks, I build websites that don't just function—they feel alive. I have a proven track record of designing cinematic landing pages and intuitive web applications from scratch. Currently focused on blending technical performance with premium GSAP animations to deliver "wow" experiences directly in the browser.

CORE COMPETENCIES

- **Languages:** JavaScript (ES6+), HTML5, CSS3
- **Frameworks & Libraries:** React.js, Next.js, Tailwind CSS, Express.js
- **Animation & UI:** GSAP (GreenSock), ScrollTrigger, Framer Motion
- **Tools & Ecosystem:** Git, GitHub, Vercel, Node.js, npm
- **Soft Skills:** Problem-Solving, UI/UX Principles, Adaptability, Fast Learner

PROJECTS

Zenith Matcha | Front-End Developer | [Live Project](#)

Premium landing page for a modern iced matcha brand.

- Architected a cinematic landing page focusing on a dark-mode aesthetic and sleek typography to elevate the brand's identity.
- Engineered pixel-perfect, responsive layouts using Tailwind CSS, ensuring the high-end visual experience translates seamlessly across mobile and desktop.
- Optimized critical rendering paths and asset delivery to keep the heavy visual experience running smoothly with zero layout shifts (CLS).

Cek Zakat | Front-End Developer | [Live Project](#)

Interactive Daily Zakat Calculator web application.

- Developed a robust, interactive calculator that simplifies complex Islamic alms rules into an effortless user experience.
- Leveraged React.js to handle dynamic state management, providing users with instant, real-time financial calculations without page reloads.
- Designed the UI/UX from scratch, focusing on clean typography and logical user flows to maximize accessibility for all age groups.

Interactive Web Portfolio | Front-End Developer

Personal portfolio featuring high-end animations and custom interactions.

- Designed and built a highly interactive personal portfolio from the ground up using HTML, CSS, Vanilla JS, and GSAP.
- Programmed custom DOM events to create a magnetic cursor, seamless bilingual toggling (ID/EN), and a bespoke loading screen.
- Implemented ScrollTrigger to choreograph complex scroll-based reveal animations, demonstrating a deep understanding of browser paint performance.

EDUCATION

SMA Al Fusha Islamic Boarding School

MIPA (Matematika dan Ilmu Pengetahuan Alam)
